MAKING MANUFACTURING ROCK STARS

Avanceon, one of the largest systems integration companies in North America, specializes in defining, developing, executing and implementation of manufacturing automation and information solutions. We know from thirty plus years, that our success is predicated by making every customer successful or, as we like to call it, **a Manufacturing Rock Star**. We promise to help our customers, partners, and team members achieve Rock Star status. Rock Stars embrace the work spotlight and seek challenges therefore generating top results, value and efficiency. Our industry experience allows us to anticipate customers' needs and uncover all information needed to deliver rockin' solutions. We provide support beyond project completion, for as long as needed.

Avanceon's services include: envisioning, planning and specification development; equipment selection and OEM management; electrical, process and mechanical system engineering; automation and SCADA application development; Manufacturing Execution Systems; field install/start-up; training; and system support. Avanceon also has extensive experience with core competencies in food and beverage, pharmaceutical, CPG, water and metals.

At the end of the day, our promise is to ensure your success and make you a Manufacturing Rock Star. On every project, every time!
